SUBJECT INDEX

VOLUME 47, 1984

Accelerators
Dose equivalent from, estimation from ^{11}C activation in plastic scintillators 837
x rays from 24-MV medical linac, transmission in concrete 819
x-ray spectra from clinical, primary and leakage 811
Activation Detectors
Photoneutron contribution from thermal neutron shield of 107
Alpha Particles
Spectral data quantitative analysis using minicomputer 85
Americium-241
Distribution in freshwater snails, variability of 485

Beryllium-7
Sampling in ground-level air at Palermo 96
Birds
Radionuclides in raptor castings, nuclear fuel-cycle 723
Bones (see Skeleton)
Building Materials
Radioactivity in Greece 775
Buildings
Radon-222 and decay-product equilibrium in 385
Radon concentrations and infiltration rates in U.S. cities 579
Radon progeny concentrations in and around dwellings in Netherlands 271
Radon progeny concentrations in Pittsburgh area 399

Calcium-47
Uptake by human skeleton and comparative metabolism 857
Canada
Radiation workers in, projected whole-body career doses for 693
Ultrasound therapy devices in Manitoba, survey of 595
Cancer (see Neoplasms)
Cesium-137
Content in mule deer near waste management ponds on Hanford site 753
Sampling in ground-level air at Palermo 96
Uptake by trees in contaminated flood plain 375
Coal
Fly ash radionuclides, lung clearance classification of 37
Radionuclides from fly ash of, environmental effects of 407
Curium-244
Uptake by trees in contaminated flood plain 375

Dielectric Track Detectors
Use for personnel neutron dosimetry 525
Use for radon daughter diffusion constant and working level measurements 9
Use for radon daughter measurement 263
Dogs
Plutonium-237 and Pu-239 retention in St. Bernard dogs 629
Plutonium-induced wounds in beagles 73

Ecosystems (see also Plants)
Radionuclide release in, probability for human intake of random 281
Tritiated water activities in air, vegetation, and soil under steady-state conditions 635
Einsteinium-253
Distribution in juvenile miniature swine 472
Emergency Preparedness
Disparity between nuclear and other rare catastrophic events 521
Nuclear accidents in, emergency plans for 701
England
Iodine-129 in ovine thyroids 488
Eyes
Radiation damage to cornea from CO_2 laser 829

Fallout
Neptunium-237 concentrations 786
Federal Republic of Germany
Radon-222 concentrations and decay-product equilibrium in dwellings and open air 385
Fission Products
Health impact of Cosmos satellite 225
Food Products
Iodine-131 losses in processing contaminated milk into whole milk powder 644
France
Nuclear accidents in, emergency plans for 701

Gamma Radiation
Detection of low-energy, Ge detector for in vivo 569
Monitoring in environment, scintillation spectrometer for continuous 559
Survey meters for, calibration correction factors for 613
Gastrointestinal Tract
Radionuclide activities and transformations following ingestion 305
Radon-222 in, proposed modification of ICRP Publication 30 model 243
Greece
Radioactivity in building materials 775

Health Physics journal
References in, format of 7
Units in, International System of Units, tables of abbreviations, prefixes and derived units 1
Health Physics Society
Annuals awards, 1984 679
Distinguished Scientific Achievement Award, Patricia Wallace Durbin
Distinguished Scientific Achievement Award, Bernd Kahn
Distinguished Scientific Achievement Award, Clarence C. Lushbaugh
Elda E. Anderson Award, Kenneth L. Mossman
President's message - 1984 677
Human Populations
Dose assessment for annual airborne releases, ingestion pathway factor in 429
Emergency preparedness for nuclear and other rare catastrophic events 521
Health impact of radioactive debris from Cosmos satellite 225
Radiation doses from mill tailings release and mine effluents 21
Radiation-induced cancers, life-table factors for 47
Radiological risks, coal energy vs nuclear energy 123, 124, 116, 115
Somatically effective dose from diagnostic radiology 299

India
Nuclear medicine evolution and safety 314
Iodine-129
Content in ovine thyroids from England 488
Iodine-131
Losses during processing of contaminated milk into whole milk powder 644
Monitoring of, rabbit thyroids for environmental 890, 932, 1014
Ionization Chambers
Calibration of survey meters, correction factors for 613
Italy
Beryllium-7 and cesium-137 concentrations in ground-level air at Palermo 96

Japan
Radionuclides from coal-fired power plants, environmental effects of 407

Krypton-85
Disposition and effects in pregnant rats 417
Toxicology 59

Laser Radiation
Effects of CO_2 pulsed, on cornea 829
Lead-203
Uptake by human skeleton and comparative metabolism 857
Lead-210
Content in teeth, relationship to radon daughter exposure 253
Content in uranium mine and mill workers 632
Lungs (see Respiratory System)
Lymphocytes
Mitogenic responses of normal human, effects of sera from radium dial painters on 309

Microwaves
Assessment around diathermy rf capacitive applicators 235
Mollusks
Americium-241 distribution in freshwater, variability of 485

Nuclear Facilities (see Nuclear Power Plants; Thermonuclear Reactors)
Nuclear Facilities
Neutron dose in environs of, measurement using moderated-type detector 1025
Radionuclide concentrations in mule deer on Hanford site 753
Neoplasms
Life-table factors for radiation-induced 47
Risk assessments for radiation-induced, unifying concept for 533
Netherlands
Diagnostic radiology in, somatically effective dose from 299
Radon progeny measurements in and around dwellings 271
Neptunium-237
Production during atmospheric testing 786
Neutrons
Dosimetry in nuclear facility environs using moderated-type detector 729
Dosimetry using particle tracks in solids, personnel 525
Spectra of, recursion unfolding algorithms for 587
Nickel-63
Analysis in urine, optimization of 623
Norway
Radon to thoron progeny ratios in Fen area 784

Nuclear Medicine
Evolution and safety in India 314
Intraperitoneal administration of phosphorus-32, dose estimation to infant from breast milk 991
Quality assurance in, computerized approach 468
Radiocontamination from diagnostic 297
Nuclear Power Plants
Accidents at, French emergency plans for 701
Radiological risks from, vs coal-fired plants 123, 124, 115, 116

Obituaries
Herbert M. Parker 517
Occupational Exposure
Career doses for radiation workers in Canada, projected whole-body 693
Excretion models for prolonged tritium 102
Lead-210 in uranium mine and mill workers 632
Promethium-147 body burden of dial painters 324, 326
Radiation protection in luminous dial factory using ^{147}Pm 879
Sera from radium dial painters, effects on mitogenic responses of normal lymphocytes 309
Tritium compound metabolism and intake limits 761

Pennsylvania
Radon progeny concentrations in buildings in Pittsburgh area 399
Phosphorus-32
Intraperitoneal administration of chromic phosphate, dose estimate to infant from breast milk 452
Plants
Radioactivity in books produced from, during last 50 years 447
Radionuclide uptake by trees in contaminiated flood plain 375
Tritium assimilation in photosynthesizing leaves exposed to HTO 849
Plutonium-237
Retention in St. Bernard dog 629
Plutonium-238
Uptake by trees in contaminated flood plain 375
Plutonium-239
Implantation in beagles to mimic hand wounds 73
Retention in St. Bernard dog 629
Plutonium
Measurement in vivo, Si(Li)-NaI(Tl) detector for direct 711
Power Plants
Radiological risks from coal-fired, vs nuclear 123, 124, 115, 116
Radionuclides from coal-fired, environmental effects of 407
Promethium-147
Body burdens of dial painters, excretion data for estimating 324, 326
Radiation protection measures in luminous dial factory 879
Proportional Detectors
Performance of moderated-type, for environmental neutron measurements 729

Radiation (see Alpha Particles; Fallout; Gamma Radiation; Laser Radiation; Microwaves; Neutrons; Ultrasound; x Radiation)
Radiation Detectors (see also Activation Detectors; Dielectric Track Detectors; Ionization Chambers; Proportional Detectors; Scintillation Detectors; Semiconductor Detectors)
Calibration of, automated source well for 455
Criteria for issuing personnel dosimeters 101 ,102

Radiation Doses (see also Occupational Exposure)
Assessment from mill tailings release and mine effluents 21
Comments on ALARA 321, 323, 324
Concepts of dose and dose equivalent 603
Estimation from phantom measurements in diagnostic radiology 463
Estimation to infant from breast milk following intraperitoneal administration of phosphorus-32 452
Measurement of photoneutron, from 33-MeV x-ray radiotherapy beam 107
Responses to intermittent lognormally distributed, simulated 745
Risk assessment for, unifying concept for carcinogenic 532
Risk estimation for low, regulatory implications of 345
Radiation Protection
Criteria for issuing personnel dosimeters 101, 102
Emergency plans for nuclear accidents in France 701
Hazards from coal fly ash 37
Regulatory implications of dose-effect relationships 345
Radioactive Wastes
Disposal of, deep-ocean 937, 980
Radioactivity removal from receptor binding assay aqueous 640
Radionuclide concentrations in mule deer near waste management ponds on Hanford site 753
Radionuclides in raptor castings as adjunct to monitoring program 723
Radionuclides
Content in books produced during last 50 years 447
Content of nuclear fuel-cycle, in raptor castings 723
Dose assessment for annual airborne releases, ingestion pathway factor 429
Ingestion of, activities and total number of transformations in organs following 305
Intake of randomly released, probability for human 281
Lung-clearance classifications for coal fly ash 37
Radioassay, evaluation of internal control measurements in 361
Radium-226
Uptake by trees in contaminated flood plain 375
Radon
Exhalation from materials, moisture and temperature dependence 480
Radon-222
Concentrations and decay product equilibrium in dwellings and open air 385
Concentration in GI tract, proposed modification of ICRP Publication 30 model 243
Radon-220
Decay product ratios to radon daughters in thorium-rich areas 784
Radon Progeny
Concentrations and infiltration rates in buildings 579
Concentrations in buildings in Pittsburgh area 399
Content ratios to thoron progeny in thorium-rich areas 784
Diffusion constants and working levels, measurement using nuclear track technique 9
Dose equivalent from short-lived, effective 476
Inhalation exposure rate, relationship to lead-210 content in teeth 253
Measurement in and around dwellings in the Netherlands 271
Measurement using nuclear track technique 263
Respiratory System
Lung-clearance classifications of radionuclides in coal fly ash 37
Uranium removal from, long-term 443
Rodents
Krypton-85 disposition and effects in pregnant rats 417
Krypton-85 toxicology of Wistar rats 59

Ruminants
Iodine-129 in thyroids of sheep in England 488
Radionuclide concentrations in mule deer on Hanford site 753

Scintillation Detectors
Performance of Si(Li)-NaI(Tl) detector for direct measurement of Pu in vivo 711
Design of scintillation cell 93
Dose equivalent estimation from ^{11}C activation in plastic 837
Use as continuous environmental gamma monitor 559
Semiconductor Detectors
Performance of Si(Li)-NaI(Tl) detector for direct measurement of Pu in vivo 711
Use of high-purity Ge, for in-vivo low-energy photon emitters 569
Skeleton
Lead-203 uptake by human 857
Strontium-89
Concentrations in environmental samples, generalized linear equations for 458
Strontium-90
Concentrations in environmental samples, generalized linear equations for 458
Content in mule deer near waste management ponds on Hanford site 753
Uptake by trees in contaminated flood plain 375
Swine
Einsteinium-253 distribution in juvenile miniature 472

Taiwan
Radiation protection in luminous dial factory using ^{147}Pm 879
Thermonuclear Reactors
Dose rate levels from prompt and delayed radiation from Frascati Tokamak Upgrade Tokamak 867
Thorium-232
Content in gas mantles 111, 112
Tritium
Activities of tritiated water in air, vegetation, and soil under steady-state conditions 635
Assimilation in photosynthesizing leaves exposed to HTO 849
Excretion following prolonged occupational exposure 102
Metabolism of compounds of, worker intake limits from 761
Rainout in U.S., 1972-1980 293

Ultrasonics
Survey of ultrasound therapy devices in Manitoba 595
United States
Radon concentrations and infiltration rates in U.S. cities 579
Tritium rainout, 1972-1980 293
Units
Adoption of International System of Units, by Health Physics 1
Definition of sievert 651
Tables of International System of Units, abbreviations, prefixes and derived units 3
Uranium-238
Doses from decay series of, from mill tailings and mine effluents 21
Uranium Compounds
Removal of, very long-term 443

x Radiation
Detection of low-energy, Ge detectors for in vivo 569
Dose from diagnostic radiology in Netherlands, somatically effective 299
Doses in diagnostic radiology, estimation from phantom measurements 463
Reactions with thermal neutron shield of activation foil detector, photoneutron contribution from 107
Spectra of primary and leakage, for clinical accelerators 811
Transmission in concrete, from 24-MV medical linac 819
x-Ray Equipment
Collimator slit alignment for Panorex dental units 642
